Option 1: **limited edition CD** with its cool look

(with art, photography, list of musicians & tracks, all in an eco-friendly 4-panel wallet design to hold in your hands)

to let *SPARKS* fly…. off the shelves!

buy from me *at concerts or with the domestic sales option of $24 which includes 24+ songs(!), shipping & handling, applicable state & local use tax, and even an autograph if you want! (And even better deals if you buy several CDs at a time or buy in-person.) For these mail orders, you'll just send me a PayPal payment by clicking here (choose "Send", enter the amount, and use "Add a Note" to indicate information like your mailing address, who you want the CD autographed for, as well as how to reach you if I have questions).*

Option 2: MP3 download (if you no longer use a CD player!)

from Amazon, iTUNES, etc.

*typically, the usual 99¢/song…. but only about **40¢/song** by getting the full album!*

Option 3: Stream *HERE* or *HERE*

I get the convenience of streaming and in this era of "free" music, so it's a huge compliment when streamers decide independent artist work is worth supporting by later buying it (Option 1 or 2) or throwing a tip into the virtual guitar case (click here and choose "Send" and say "gift" in the notes field) to help cover the pro musicians, studio time, mastering, art, manufacturing, etc. since there wasn't time for a Kickstarter campaign. So if you value the ethos of paying artists for their work (since it takes literally thousands of Spotify streams to match the revenue of one album sale), and have financial means to do so, thank you for supporting this project (and then you can still also stream away!).

as you listen, enjoy access to lyrics, etc. at:

https://larrylesser.com/sparks

and don't be too shy to reach out and share your reactions –
I find it so meaningful and insightful to hear from listeners!
